

## Glass Fiber Rope

### Product Description

For the manufacture of different textiles, F y E, S.A. uses 9 micra diameter continuous filaments of "E" glass which have been previously texturized. This texturizing gives the threads a stable volume increase and, with this, high quality insulating textile products are obtained.

Glass textiles can be in continuous use at temperatures of up to 450° C, being able to endure up to 600° C, if exposure is short. They are fireproof, resistant to steam and most chemical agents and have excellent tensile strength.

### Technical Data

Dimension	:	3 mm. .... 60 mm
Type of fiber	:	E-Glass
Fineness of fiber	:	6 – 15 µm.
Continuous Temperature	:	450 °C
Maximum Temperature	:	600 °C
Colour	:	White

**WARNING:**

Properties/applications shown throughout this brochure are typical. Your specific application should not be undertaken without independent study and evaluation for suitability. For specific application recommendations consult Montero. Failure to select the proper sealing products could result in property damage and/or serious personal injury. Performance data published in this brochure has been developed from field testing, customer field reports and/or in-house testing.
