

PTFE Graphite Fiber braided packing Style 1140

PTFE graphite fiber braided packing style 1140 consists of PTFE yarn containing graphite particles. It has great tear strength and high thermal, low coefficient of friction also makes it stability and long service. Recommended for sealing pump shafts, and it is to seal water, steam, solvents for agitators, mixers, autoclaves and centrifugal pumps etc.

Technical Data:

Maximum Temperature	:	280 °C
Minimum Temperature	:	-200 °C Cryogenics
Maximum Pressure	:	30 MPa.
Maximum Velocity	:	20 m/s
Chemical Resistant (pH)	:	0 – 14
Application	:	All Pumps and Vales

WARNING:

Properties/applications shown throughout this brochure are typical. Your specific application should not be undertaken without independent study and evaluation for suitability. For specific application recommendations consult Khuner. Failure to select the proper sealing products could result in property damage and/or serious personal injury. Performance data published in this brochure has been developed from field testing, customer field reports and/or in-house testing. While the utmost care has been used in compiling this brochure, we assume no responsibility for errors. Specifications subject to change without notice. This edition cancels all previous issues.
