

PTFE packing with aramid corners Style 2213

PTFE packing with aramid corners Style 2213 is a braided packing made of PTFE yarns fiber and the reinforced corner yarns of Aramid fiber. This structure enhances the lubrication of Aramid fiber and reinforces the strength of the pure PTFE packing. This special combination packing play a very important role in the sealing of high pressure piston pump.

Technical Data:

Maximum Temperature	:	280 °C
Minimum Temperature	:	-200 °C Cryogenics
Maximum Pressure	:	25 Mpa (Valve)
Maximum Velocity	:	20 m/s
Chemical Resistant (pH)	:	2 – 12
Application	:	All Pumps and Vales

WARNING:

Properties/applications shown throughout this brochure are typical. Your specific application should not be undertaken without independent study and evaluation for suitability. For specific application recommendations consult Khuner. Failure to select the proper sealing products could result in property damage and/or serious personal injury. Performance data published in this brochure has been developed from field testing, customer field reports and/or in-house testing. While the utmost care has been used in compiling this brochure, we assume no responsibility for errors. Specifications subject to change without notice. This edition cancels all previous issues.
